

# Mid Cap Equity Fund

## OBJECTIVES AND PHILOSOPHY

The Mid Cap Equity Fund seeks to *maximize long-term capital appreciation*. In pursuing its goal, the Fund invests primarily in the common stock of mid-capitalization companies traded in the U.S. The Adviser considers a mid-capitalization company as one with market capitalization, at the time of purchase, within the range of companies included in the Russell Midcap® Index. Highly speculative or illiquid stocks are not candidates for the Fund. To control risk, extreme overweighting or underweighting of the Fund relative to the Russell Midcap® Index is normally avoided. The Fund will normally invest in approximately 75 to 125 companies.

The Adviser employs a Growth at a Reasonable Price (GARP) investment philosophy in the management of the Fund. The GARP approach provides an opportunity to invest in companies with strong earnings growth selling at attractive valuations.

The Gross and Net Expense Ratio for Institutional are 1.17% and 1.10%, respectively, and Original Shares are 1.44% and 1.35%, respectively, which are the amounts stated in the current prospectus as of the date of this report. Investment performance reflects fee reductions. In the absence of such reductions, total return would be reduced.

\* Average annualized returns.

Performance data quoted represent past performance, which does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance to the most recent month-end may be lower or higher than what is shown and may be obtained at 800-280-6111. The table does not reflect the deduction of taxes that a shareholder would pay on Fund distributions or redemption of Fund shares.

#### DISCLOSURES

**Mutual fund investing involves risk. Principal loss is possible. Growth stocks typically are more volatile than value stocks; however, value stocks have a lower expected growth rate in earnings and sales. Medium-capitalization companies tend to have limited liquidity and greater price volatility than large-capitalization companies. Investment in IPOs can be volatile and can fluctuate considerably. IPOs can have a magnified impact on funds with a small asset base. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods.**

The Russell Midcap® Index is a subset of the Russell 1000® Index and includes approximately 800 of the smallest securities based on a combination of their market cap and current index membership. The Russell Midcap Growth Index measures the performance of the mid-cap growth segment of the U.S. equity universe. It includes those Russell Midcap Index companies with higher price-to-book ratios and higher forecasted growth values. The Standard & Poor’s 500 Index (S&P 500®) is an American stock market index based on the market capitalizations of 500 large companies having common stock listed on the NYSE or NASDAQ. The S&P 500 index components and their weightings are determined by S&P Dow Jones Indices. Index vendor sources may vary, resulting in slight variations in the index returns that are displayed in performance reporting for the Rainier Funds. The Indices are not available for investment and do not incur charges or expenses.

Fund holdings and sector weightings are subject to change at any time due to ongoing portfolio management. References to specific investments should not be construed as a recommendation of the Fund or the Adviser to buy or sell securities and these investments do not represent all, and may represent a small percentage of, the Fund’s holdings. There is no assurance that the securities purchased remain strategy investments or that securities sold have not been repurchased. **Current and future Fund holdings are subject to risk.**

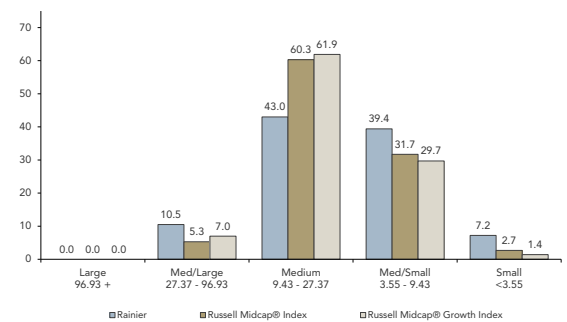

Although the Fund is no-load, management and distribution fees do apply.

Market capitalization is the total dollar market value of all company’s outstanding shares. The Price to Earnings (P/E) Ratio reflects the multiple of earnings at which a stock sells. Earnings per share (EPS) is total earnings divided by the number of shares outstanding. Growth at a Reasonable Price (GARP) is an equity investment strategy that seeks to combine tenets of both growth investing and value investing to find individual stocks. **Earnings growth is the annual rate of growth of earnings from investments.**
